Discovery World Montessori

We aim to provide every student with the important language skills and the mathematical thinking to advance in their learning.

Developing the ability to write proficiently and read critically, our students will excel beyond the classroom and exceed its expectation. In addition, we will provide Chinese learning that emphasizes on not only conversational Mandarin but also building the necessary reading and writing skills. On Fridays, we will provide enrichment programs such as speech development, Math games, Science experiments and the arts so our student will have a rounded learning experience.
